

Zebra® Patient ID solutions

SEE MORE. DO MORE.

Zebra Technologies cover patient identification like nobody else can

Failure to correctly identify patients is one of the most serious risks to patient safety. Zebra's range of adult, paediatric and maternity wristband solutions covers a wide range of requirements from those relating to patient comfort and reducing medical errors through to improving workflow and streamlining admissions processes.

Trying to do more with less, whilst avoiding costly errors and wasted time, is increasingly difficult. When it comes to printed wristband solutions, Zebra have got it covered. Whether you're looking to overhaul and modernise your practices, or update your current system with minimal disruption, Zebra has a solution.

Z-Band® wristbands

Zebra's direct thermal printable wristbands offer a simple and effective method of identifying patients quickly and clearly with minimal fuss. Designed for use in Zebra's market-leading thermal printers, durable text and barcodes can be printed on-demand to help ensure positive patient identification.

Laserband wristbands

Zebra's self-laminating direct print laser wristbands allow quick deployment of a bar-coded wristband solution. Simultaneous printing of patient wristband and chart labels on one sheet using your existing laser printers allows quicker printing of information, streamlining patient admissions.

"...a credible printing solution which meant Great Ormond Street Hospital rolled out a system that was NPSA compliant, yet easy for staff to operate."

Meredith Mora,
CRS Project Manager,
Great Ormond Street Hospital for Children NHS Trust, United Kingdom.

Z-Band UltraSoft

Z-Band UltraSoft is the softest direct thermal printable wristband on the market. Developed specifically to meet the needs of patients with delicate skin, this flexible synthetic material has a soft-feel reverse side for superior comfort. Wristbands are latex-free and MR-Safe⁺ and are available in adult, paediatric and baby sizes.

Z-Band Direct

Offering the same durability and ease-of-use benefits as Z-Band UltraSoft, Z-Band direct is our most popular direct thermal wristband material, designed specifically for patient identification. A flexible polypropylene with a protective varnish and an intuitive adhesive tab closure design offers comfort, durability and simple application for busy nursing staff. Wristbands are latex-free and MR-Safe and available in white and red. Red bands are typically used as a visual alert to nursing staff, where a patient has a specific medical condition.

- Direct thermal, ribbon-less printing for superior ease-of-use and the ability to quickly print and apply to patients.
- UV varnish provides resistance to water, hand-sanitiser gels, mild cleansers and other substances used in hospitals, ensuring print remains legible throughout a typical hospital stay.
- Antimicrobial coating helps prevent the spread of common hospital infections.
- Wristbands include tamper-evident security slits to ensure wristbands cannot be removed and re-applied.

Laserband[®] 2 Advanced

Laserband[®]2 Advanced wristbands feature an advanced shape and design that makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort. Latex-free and with options to print wristbands and patient chart labels simultaneously, LaserBand wristbands can be printed using the majority of laser printers on the market.

- Self-laminating design protects printed text and barcodes ensuring wristbands are durable enough to remain legible throughout the patient journey.
- Wristbands include tamper-evident security slits to ensure wristbands cannot be removed and re-applied .
- Integrated wristband extender bar to fit a wide range of wrist sizes.
- Adult, paediatric and baby sizes available in white and red, as well as formats specifically designed for maternity and neonates.

Z-Band Fusion

Zebra's self-laminating Z-Band Fusion direct thermal polypropylene adhesive closure wristband is perfect for use at specialised hospitals where the average patient stay exceeds 14 days. The self-laminating design protects the printed text and barcodes. The advanced shape makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning. Latex-free, available in white and red.

- Integrated wristband extender bar to fit a wide range of wrist sizes
- Available in adult, paediatric and baby sizes
- Includes Patient Chart Label
- Scannable up to 60 days
- Printable using Zebra 4" wide desktop printers

Z-Band QuickClip™

Direct thermal, flexible polypropylene wristbands featuring a clip closure. Designed specifically to help improve patient safety during a typical hospital stay. Adult and paediatric sizes as well as coloured clips are available. Resistant to water, mild soaps and hand gels used in hospitals. These wristbands are also latex-free and MR-Safe.

Z-Band Direct Soft Infant

Direct thermal, flexible, polypropylene wristbands with a soft, nylon backing. Specifically designed with new-born babies in mind. Softer, smaller bands with an adjustable adhesive closure enabling positive patient identification of even the smallest patients. Resistant to water, mild soaps and hand gels used in hospitals. Latex-free and MR-Safe.

ComfyCuff®

Complementary to our range of printable wristband products, we also offer our non-printable ComfyCuff padded cuffs. Designed for use with the infant wristbands and ID tags this product is suitable for use with new-born babies and neonates who have the most sensitive skin. The ComfyCuff is also available in a larger size, for identification of elderly patients with delicate skin.

HC100

The world's first purpose-built wristband printing solution.

Zebra's complete and integrated wristband solution combines the small-footprint HC100™ direct-thermal printer with easy-to-load Z-Band wristband cartridges. Its smart technology senses the wristband type and auto-calibrates the settings for optimised print quality.
